

# PRO WATER SOLUTIONS SOFTENER SERIES

## DO YOU HAVE A PROBLEM WITH HARD WATER?

Enhance water quality throughout your home or business with Water Pro 30,000 to 120,000 grain water softeners. Pro Water Solutions water softeners are programmed by our professional licensed installation technicians for your water hardness and usage patterns to help ensure that you have the most efficient water softener available.

Using soft water results in reduced water scale buildup in water pipes, bathroom and kitchen fixtures, and in water heaters. Soft water saves up to 25% on appliance energy consumption. Water softeners are environmentally friendly water treatment systems that have been proven by research conducted by the Water Quality Research Council and the Water Quality Association to help the earth.

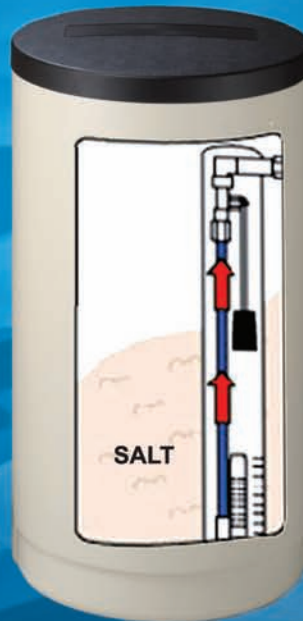

Other benefits include:

- Use 50% less soap
- Say goodbye to dry flaky skin caused by hard water
- Clothes and fabrics have a longer life
- Spot-free dishes, silverware, and glassware
- No more aggressive cleaners needed to combat hard water stains
- Improves ALL Water Heater Performance

Warranty:

Valves – 5 years

Tanks and Media – 10 years

Further enhance your cooking and drinking water by adding this reverse osmosis unit to the purchase of any whole-house system and save 40% on the system below.
